Ask \$102,258 for Flood Control in Palm Springs

A resolution was passed by the city council last night requesting Governor Frank Merriam to allocate \$102,258 of the state's emergency flood control fund for three flood control projects in Palm Springs.

These included the following:

A sunken pavement, to serve as street and storm drain for Tachevah wash paralleling the school grounds on the north, following the northern boundary of the Indian reservation (section 14) for a half mile, and then south to Ramon Road.

Sunken pavements such as Baristo Road, the concrete road from the McManus residence past the Del Tahquitz to the lower wash, have proven very effective in rapidly carrying away flood waters. Such a street would take flood waters, such as menaced the school, the Colonial House, and other valuable properties the past two seasons.

Straighten the channel of Tahquitz Wash north of the bridge (south-west of the Palm Springs Builders Supply Co. plant).

Straighten the channel of Palm Canyon wash between Smoke Tree and Araby and also north of the main road so as to avoid floods in the southeastern part of town.

City Planning Described By Coil

Attorney Henry Coil, chairman of the planning commission of Riverside and a foremost authority on city planning and zoning, addressed the Lions Club yesterday noon at a meeting which filled to capacity the dining room of the Palm Springs Hotel. Fully 75 Lions and guests were present.

Raymond Cree was chairman of the meeting, and in introducing the speaker he said that more than 30 years ago certain deed restrictions were placed on local property, and that subdividers—ever since have maintained proper deed restrictions.

Attorney Coil said that Palm Springs is fortunate that the property owners here have been people of vision, who have insisted on worth-while restrictions, therefore this city will not have the difficulties encountered by older communities that start a program of city planning and zoning.

City planning and zoning is accomplished under police power, which is inherent in every government to preserve the health, peace, safety, convenience, comfort, happiness and general welfare of the citizens, he said.

FUTURE DEVELOPMENT

The problem of city planning and zoning should be approached in a very broad and public-spirited manner, he emphasized. It includes provisions for the future development of subdivisions, streets, parks, playgrounds, a civic center, etc.

Palm Springs should plan to have a wide major thoroughfare, tree-lined and landscaped, like Euclid Avenue in Ontario or Victoria Avenue and Magnolia Avenue in Riverside.

It is senseless to park cars on the streets. A parked car takes up eight feet of the street, and the cost of paving this space costs from \$25 to \$30. Parking lots should be provided so as to leave the main street for traffic. It is to the advantage of stores in the retail shopping district to have such parking lots, because under existing conditions there is no parking space available anyway in front of their stores said Attorney Coil.

Streets in the residential sections should be built to discourage traffic. He said a fine start had been made here in this respect by providing interesting winding roads in the better subdivisions.

CIVIC CENTER

The speaker stressed the importance of a civic center. The city hall, library, post office, woman's club house, lodge halls, and other public buildings should be together in one district. By making plans early for a civic center much trouble can be avoided. If it isn't done, log rolling and conflicting factions in various parts of town will have such buildings scattered all over the town.

(Continued On Last Page)

Appoint New Department Heads

The following additional department heads were appointed by the city council last night:

Jerry Sanborn, street superintendent.

J. F. Davidson of Riverside, city engineer.

George Robertson, public accountant of Riverside, city auditor, to serve until June 30. He will set up the books for the city and prepare the first fiscal report.

Charles Burkett was previously appointed city building inspector.

High School Election Next Friday, June 3

Next Friday is election day in Palm Springs to elect two high school trustees. The candidates are Dr. Leonard Wood, Mrs. Nell Kobs, Raymond Trudeau, all of Banning, and Mrs. Hazel Koger of Cabazon. The terms of office of Mrs. Robina Hemmerling and Mrs. Koger expire. Mrs. Hemmerling is not a candidate for reelection. The voting place is at the school house and the polls will be open from 1 to 5 p. m., Friday, June 3.

Munholland Office To Remain Open All Summer

John Munholland, prominent Palm Springs and Long Beach realtor, announced this week that his office on North Palm Canyon Drive will be open all summer in the able charge of Charles Mathews, popular village realtor.

Mr. and Mrs. J. G. Munholland plan to move to Idyllwild soon, where they will spend the summer. Mr. Munholland visiting Palm Springs two or three times a week to take care of business matters.

The office of Munholland and Company has been air-conditioned and Mathews states he expects to spend a quite comfortable summer in the village, at least during working hours. Already Mathews reports the sale of a lot in Merita Vista Tract formerly belonging to Anatole J. Drolet to a Beverly Hills man who contemplates building during the summer.

Prison work on the new Banning-Idyllwild road has slowed down, since there is no money for operation of the power shovel. The prisoners are doing hand work.

Designate Main Traffic Arteries

Main traffic arteries, which will be maintained by the city's 1/4-cent fund of the state gasoline tax, were designated last night by the city council. These streets are:

Indian Avenue from the north city limits (north of Racquet Club) to the junction of South Palm Canyon Drive (at Bill-Al's night club).

Indio road from the junction to east city limits near Araby.

Ramon Road from Cahuilla street (two blocks west of Palm Canyon Drive) to eastern edge of city past the Field Club and high school and beyond the sewage disposal plant.

Tamarisk Road (at El Paseo and Pacific buildings) from Palm Canyon Drive to Sunrise Way (eastern border of section 11 in Desert Sands Tract).

Sunrise Way from Tamarisk Road to Ramon Road. (A new street dedicated to the city by Mrs. Pearl McManus, the Field Club and others to the city to provide a main street from the northwestern part of town to the new high and grammar schools).

\$5000 STATE FUNDS

The city will receive approximately \$2500 from the state gas tax funds this year, after July 1st, for the maintenance of these streets. An effort will be made to have the county road department do the work during the first year because the county has the necessary equipment.

The city will also receive \$2500 for the maintenance of the state highway (Palm Canyon Drive) through town. This money will be administered by the state highway department.

The council last night created a special gas tax improvement fund, and all state monies will be deposited in this fund.

243 Attend Baccalaureate Service Sunday

The baccalaureate services held last Sunday night at the Palm Springs Community church found a large congregation of 243 assembled to witness the ceremonies.

Many came from Banning, Cathedral City and Indio to attend the service in honor of as fine a group of young people as can be found anywhere.

Accompanied by the members of the faculty and Dr. W. C. Gunnerson, superintendent of schools, Banning Union High School district, almost the entire graduating class and about 31 members of the Banning Union high school glee club, under the direction of Miss Eleanor Bird, occupied the prominent place in the church. Participating in the services were the Rev. B. B. Weatherall, presiding, Rev. Paul A. Lomax offering the invocation, and Rev. M. S. McKercher giving the benediction.

Dr. Macartney, pastor of the church, gave the address, selecting as his text the words of Queen Vashti, when she refused to exhibit herself in the banquet hall of King Ahasuerus before his drunken Lords. The word "No," which the speaker said was one of the shortest, one of the most important for young people to learn, and one of the most difficult to pronounce.

Councilman Williams Ill In Hospital At Loma Linda

Councilman John W. Williams, who became ill last Sunday, was taken to the Loma Linda hospital Tuesday, where he is now recuperating.

The prominent local realtor seems to be suffering from the same trouble that sent him to Loma Linda last fall, a disorder resembling intestinal flu.

Due to this illness Councilman Williams was unable to attend Wednesday night's meeting of the city council.

Credit Bureau Asks For Credit Rating On All Customers

The Palm Springs Business Men's Association is mailing a circular letter to every individual, firm and corporation engaged in business in Palm Springs, urging them to furnish the Association's Credit Bureau with a complete list of all their customers, the amount of credit extended to each one, balance owing, date of last payment, paying habits and other credit information. With this information in hand the Bureau will set up its confidential credit files.

Want To Form Palm Springs Township

The creation of a new township, comprising only the city of Palm Springs, was discussed by the city council last night. If this is accomplished, Palm Springs can have its own justice of the peace and constable and it would no longer be necessary to travel 45 miles in order to transact business in the San Geronimo township justice court in Banning. The formation of the new township would have to be granted by the county board of supervisors.

Police Dog Abandons Pups In Garden

They say that the "usual in California is the unusual" and that "one shouldn't be surprised at anything in Palm Springs" and the like, but an event that was brought to the attention of a *Desert Sun* reporter this week was almost too much.

In most cities the size of Palm Springs mothers are satisfied to keep their own babies and care for them; and when some unconventional soul breaks away from this established custom and leaves her child on some unsuspecting person's doorstep, the fine ladies of the community are justly horrified.

But here in Palm Springs we're even more unconventional, and "getting the cart before the horse" or having "the dog bite the man" as it were, or dogs go about leaving their young on the doorsteps of local mansions. And that is exactly what happened in the village this week.

One day early in the week Miss Jennie E. Lawson, who lives on Ramon Road just east of the Cal Pierce place, heard strange noises in the garden. Investigating, she arrived on the scene just in time to see a large police dog jump over the wall of the garden after leaving a pup for her.

Early the next morning Miss Lawson again heard strange noises in her garden and again she arrived on the spot in time to see the same police dog leave another pup for her to care for.

The dog, a large beautiful police dog, carried the pups into the garden in her mouth, and it was necessary each time for her to jump over the garden wall carrying a pup in her mouth. The pups are fine looking—healthy little specimens about three weeks old, and seem none the worse for their journey. The mother wore a large collar and seemed to be a well fed animal.

Miss Lawson attempted to follow the mother dog but lost sight of her in a short distance. The police were notified also, but they could not find the dog or its owner.

It is feared that some family, leaving for the summer, could not find their dog, so drove away leaving the animal behind. For this reason the police are anxious to follow the mother dog to find where she came from, with the thought in mind that there might be more pups there that needed care.

The mother dog picked the right place to leave her two pups, as Miss Lawson has a dog of her own and is very fond of animals. Miss Lawson at one time was active in the humane society at Palo Alto, her home.

Miss Lawson is seeking a permanent home for the two little male dogs.

At the meeting of the board of directors Tuesday afternoon held in their Plaza office, Attorney Elmer Collier was engaged to incorporate the Association at once as a non-profit corporation to relieve members from any personal liability. President H. E. Patterson was absent, and Vice-President H. H. Foster presided.

The directors also voted to wage an intensive membership drive at once, and each member will take part in the campaign to induce other businesses to join.

Everyone engaged in any business is asked to join one of the following divisions: Merchant, hotel and apartment house operators, contractors, professional men and realtors.

OWES IT TO CUSTOMERS

Executive Secretary M. C. Dudley pointed out yesterday that each merchant owes it to his customers to be a member of the Association and to make use of its services, enabling him to extend credit to those who are entitled to credit, thus eliminating bad accounts and consequently reducing the cost of doing business. The good-pay customer eventually pays the expense of carrying slow-pay customers and the losses resulting from dead-beats, he said.

"Our members have shown a fine spirit of co-operation, and we feel confident that they will supply us with all the information necessary for our credit files. They will never be embarrassed by doing this and they take no risk," said Mr. Dudley, and he called attention to the following instructions of Credit and Employment Bureaus, how they should be used and re-us, how they should be used and how they serve and protect the members:

CONFIDENTIAL INFORMATION

"All information given to a bureau is confidential and treated as such.

"Each member will have a code number and reports will be given by this code or by business classification. Your name is never given, unless with your consent.

"An employee's record in Palm Springs will be kept in code.

"Only ledger experience, i.e., what the books actually show as to amounts, terms and manner of payment, together with any collateral information necessary to explain or complete a credit report is given.

"Mere conclusions founded upon personal opinion or hearsay are no basis for a credit report. They are of little value and dangerous.

"By giving information to a credit (Continued On Last Page)

Palm Springs Youth Is Honored At U. S. C.

A Palm Springs boy, Adrian Talley, was initiated last week by Skull and Dagger, senior men's honorary fraternity at the University of Southern California, as one of the twenty-one most prominent men on the Trojan campus.

Outstanding service to the university forms the basis for election to the group, highest honor to be won by a man student at the university. The initiation, held at the Lakeside Golf Club, celebrated the twenty-fifth anniversary of the organization.

Featured speaker at the initiation was Dr. Harold J. Stonier, executive manager of the American Bankers Association, educational director of the American Institute of Banking, and former vice-president of the University of Southern California.

Talley, now a resident of Palm Springs, having graduated from South Gate high school, captains the varsity track team.

City Dads Busy With Zone Law

The city council is struggling long and weary hours drafting an emergency zoning ordinance. The proposed zone map of the city was submitted to the public at two hearings held this week, and protests and suggestions were taken for consideration by the council. The first hearing was in the school auditorium Monday evening, and the second in the council chamber on the upper floor of the fire hall last evening.

Mayor Philip Boyd presided at both meetings. He read the proposed zoning ordinance, and stated it is the intention of the city council to pass such an ordinance as an emergency measure after three public hearings have been held. The two meetings this week were preliminary hearings, he said. The council will then redraft the ordinance if necessary to protect the best interests of the majority of citizens, and will hold the final hearing some time next week, before the ordinance is adopted.

PLANNING BOARD

Then it is the intention of the council to create a city planning commission which will prepare a master plan, providing for the orderly development of the city, and possibly the designation of areas for parks, a civic center, and other public uses.

During the period that the master plan is being formulated, there will be many hearings, he said, so that every resident and property owner may be thoroughly familiar with the plan before it is adopted.

In opening the discussion at the two hearings, Mayor Boyd called attention to the fact that the zoning (Continued on Last Page)

Dr. Henry S. Reid To Attend Conventions

Dr. and Mrs. Henry S. Reid left Palm Springs this week for Estes Park, Colorado, where Dr. Reid has a summer practice.

The Reids will first go to the beach for a short vacation; and then plan to be in San Francisco on June 10, where Dr. Reid will attend the convention of the American Heart Association. Following this Dr. Reid will attend the convention of the American Medical Association, of which he is a fellow. The American Medical Association will convene at San Francisco June 13 to 17.

Change Location Of Proposed Development

According to news emanating this week from the executive offices of the institution at Hollywood, the twenty-acre site of the proposed "Boots and Saddle Ranch" to be built at Palm Springs has been changed to the "North Half of the Southwest Quarter of Southwest Quarter of Section 7, Township 4 South, Range 5 East, S. B. M., being the western portion of section 7, and is adjacent to the proposed new state highway and constitutes a much more desirable location."

Jackie Coogan and his wife, Betty Grable, were seen on the streets of Palm Springs yesterday.

CATHEDRAL CITY

Much Building Underway at Cathedral City

Much building activity is in evidence at Cathedral City at the present time.

The new home of Mr. and Mrs. Alex Rich is nearing completion; it will be remembered that the Rich home was destroyed by fire in April. This new home is being built on the same lot.

Mrs. J. C. Stout of Downey is building a new winter home in the finer restricted residential district of Cathedral City on a lot sold to her last year by W. R. Hillery, real estate broker.

The dwelling being built for Mr. and Mrs. R. J. Laas of Michigan is nearly half finished.

It is also reported that several other persons contemplate building on their Cathedral City lots in the near future.

Perry E. McCullough of Laguna Beach, who owns two residences here, is adding rooms to and is greatly improving one of these.

Cobbs Showing California's Wonders To Relative

Mr. and Mrs. C. S. Cobb are busily engaged showing the wonders of California to Mrs. Cobb's sister, Mrs. Charles F. Bradham of Ravenna, Neb., who is enjoying her first visit to California.

Coming to Cathedral City to visit the Cobbs, Mrs. Bradham is enjoying a ten-day trip during which the Cobbs will drive her to interesting places in Arizona, Old Mexico and California.

The traveling party are expected back in Cathedral City in the near future.

Flood Control Progress is Reported

Congressman Harry R. Sheppard's twelve point permanent flood control program for San Bernardino, Riverside and Orange counties drew one step nearer its goal last week.

The House of Representatives last week passed the flood control bill which includes a \$6,500,000 authorization for permanent flood control construction on the San Antonio and Chino Creeks in San Bernardino county under supervision of the War Department engineers.

Mr. Sheppard's twelve point program for flood control construction under the War Department includes surveys and permanent construction on the Lower Santa Ana, Upper Santa Ana, Banning Canyon, the Mojave river, Lytle creek, Waterman canyon, San Jacinto river, Bautiste creek, Cucamonga creek, Deer creek, San Antonio creek, Chino creek and the Whitewater river.

"To obtain permanent flood control construction from the federal government through the War department requires four definite steps," stated Mr. Sheppard. "First, legislation must be introduced and passed authorizing preliminary surveys. This we have accomplished on all of our streams and all preliminary surveys should be completed by August. Second, upon completion of preliminary surveys it then becomes necessary to introduce legislation to authorize construction. Third, following authorization by Congress, final surveys and specifications must be completed under direction of the Rivers and Harbors Board of the War department, fourth, Congressional appropriation of funds for construction is then the last step to be accomplished."

"Our Lower Santa Ana project is in the process of the fourth step and funds for start of construction this summer are in the War department Civil Appropriations bill."

"The War department completed their preliminary surveys of San Antonio and Chino creeks on May 5th and therefore it was possible to include these two streams in our present authorization bill. Final surveys and specifications will now be undertaken and by January of 1939 our fourth step, namely appropriations, will be possible."

Fire Protection Discussed By Cathedral C. of C.

At a meeting of the Cathedral City Chamber of Commerce on Thursday night of last week at the Town Hall, Fire Commissioner John Kline of Palm Springs discussed with the assembled group the problem of standardization of fire hose and hydrants at Cathedral.

A committee of three, John Harrison, W. R. Hillery and George Washington, was appointed at the meeting last week to confer with the engineers of the Board of Fire Underwriters to ascertain the number of fire hydrants necessary and the proper location for the same to enable Cathedral City to comply with the regulations of that body in these matters. Also the amount of hose needed to make the fire hydrants most effective and the cost factor are to be investigated by the appointed committee.

John J. Grove stated at the meeting that if the fire hydrants were put in, the Cathedral City Water Company would furnish water free of charge for the first two years.

C. C. Cavanah, the gentleman who has for years delivered mail to Cathedral City from Palm Springs, is back on the job again, after a short absence during which time he was confined in a hospital suffering from a foot infection.

A number of Cathedralites journeyed to Painted Canyon on the evening of Friday, June 13, for a picnic—the occasion being the eclipse of the moon scheduled for late that evening.

Those enjoying the eclipse while picnicking at the famous canyon included Mr. and Mrs. C. S. Cobb, Mrs. Ruby Bone, Miss Evelyn Knudson, Mr. and Mrs. W. R. Hillery, Jack Hillery and Robert Scholtes.

E. F. Reilly, George Washington and John Harrison represented the Cathedral City Chamber of Commerce at the monthly meeting of the Riverside County Chamber of Commerce held Tuesday at Beaumont.

R. R. Miller, owner and operator of the Desert Cabinet Shop located at Hillery's lumber yard, has been ill for about two weeks but is now back at work. During his illness he stayed at his place at San Jacinto.

Some Facts About the Ultra Violet in Sunlight

The ultra violet ray in sunlight is the cause of the pigmentation or our sun tan. Blondes do tan. Look at Scandinavian sailors. The more tanned we become, the longer we can stand a sun bath. Many authorities suggest that we start our outdoor sunbathing by exposing our bodies to skyshine only for several days. A multitude of tests prove that the blue sky and also white fleecy clouds contain and project to the earth up to fifty per cent of the ultra violet present at the time and place of making the tests. This was proven at Tulane University through tests covering several years. Also Hess and Weinstock at Columbia, conducting north light experiments for prevention and cure of rickets and conclusive results using skyshine only.

Colored people, because their pigmentation, plus their clothing, prevents penetration of the ultra violet ray, are more susceptible to rickets in northern cities than the whites. Eskimos, being heavily clad, get their ultra violet through their eyes.

Rickets is a bone deficiency disease caused by the lack of vitamin D in the system, preventing the proper balance of calcium and lime. This vitamin is supplied by the action of ultra violet. Great heat is rarely recommended in connection with sun baths. On the contrary, authorities generally say: "avoid the midday midsummer's sun." "Sun baths should be taken in cool, dry, moving air free from drafts."

Our earlier ideas about ultra violet were that this ray made the pigmentation, or sun tan, which then became sort of a transformer and conductor to bodily organs. Now we have learned that the ray is absorbed by nearly everything it touches and the life or things that absorb it become chemically activated. In the case of untanned white flesh, practically all of the ultra violet is absorbed and at once starts its function of stimulating pigmentation and the fatty sterols. As the pigmentation increases it acts to filter the ray, a constantly increasing portion making new tan with a corresponding decrease in the amount capable of filtering through to make or activate our vitamin D content.

STRUCTURES MAY BE STRENGTHENED

A loan for the improvement of a structure so as to make it adaptable

to the installation of heavy equipment and machinery is insurable under the Property Improvement Credit Plan of the Federal Housing Administration.

For instance, a loan to strengthen the foundation walls and the floors of a structure may be insured, but a loan for the purchase and installation of

the machinery would not be eligible for insurance.

Palm Springs Will Get Power From This Plant

Ranchers, government and power company officials inspect the finishing of the first power plant on the All-American Canal. Output of this plant will be sold to the Nevada-California Electric for distribution over its system. Left to right: Henry Frauenfelder, president of the Yuma County Water Users Association; William Tingsley, Bureau of Reclamation engineer in charge of operating the plant; and Joe E. King, manager of the Arizona division for the Nev-Cal.

P. S. Among First To Get All-American Canal Power

Palm Springs will be among the first cities to receive power generated by All-American Canal power, as it was announced recently that customers of the Nevada-California Electric Corporation will be the first to receive power from this project.

As the 80-mile canal nears completion, the federal government is rushing the rebuilding of its Siphon Drop power plant in order that it will operate from waters of the All-American Canal.

Output of the Siphon Drop plant is sold to the Nev-Cal with the exception of a small amount of power used for operating pumps on the Yuma Irrigation project.

The model power plant, which was built in 1926, is located in eastern Imperial county and has been operating on the Yuma canal. It was designed, however, to accommodate All-American Canal waters.

The Norman I. Fidel Construction Company announced early this month that it had completed 51 per cent of its work in connecting the All-American canal with the government power plant. At the same time the Bureau of Reclamation revealed that enlarging of the plant is practically completed.

When it starts using All-American Canal water the Siphon Drop plant will have a capacity of more than 13 million kilowatt-hours annually.

According to government and irrigation officials this power plant, destined to produce the first canal power, has been an outstanding success. It has reduced the cost of pumping on the Yuma mesa more than 50 per cent, and has been more than paying for itself by the sale of power to the Nev-Cal.

In a recent speech before a national convention, George O. Sanborn, general supervisor of operation and maintenance for the U. S. Bureau of Reclamation, stated: "This plant has been highly profitable due largely to the favorable contract with the Southern Sierras Power Company (now the Nevada-California Electric) which affords a market for all surplus energy available."

"The net revenues," said the government official, "have been considerably in excess of the installments necessary to repay the cost of this power plant."

F. F. Crocker, local agent of the Nev-Cal, during an interview yesterday stated that his company is one of the largest distributors of power generated on irrigation projects. Since last August the Nev-Cal has distributed more than 110,000,000 kilowatt-hours of electricity from Boulder Dam, in addition to that purchased from the Siphon Drop plant.

The local power company also has a long-term arrangement for distributing all the power generated by the two hydro plants on the San Geronio Irrigation project in Banning canyon.

"In fact," said Crocker, "nearly all of our power used in California, Arizona, Nevada, and Mexico is made in connection with government and municipal projects, including Boulder Dam, Siphon Drop, San Geronio and hydro plants at Bishop."

High School Notes

Pupils who made relatively high scores in the second year typing speed tests on Tuesday are: Kathleen Harris 52 words per minute; Doris Dudley, 49; Anne Curry, 48; Juanita Schuster, 46; Betty Jordan, 46; Vivian Gettman, 45; Billie Bryant, 43; Frank Ortega, 43; Stanley McCallum, 42; Epifania Barajas, 42; Gene Burson, 40; Nadine Parrish, 37.

Mr. Powell's Business Principles class has started a series of reports on various social problems. Each student is assigned a chapter in the book and is required to make a report on that certain phase of the work. Topics which have been reported on this week are: tenement districts, state institutions, rural health problems, and juvenile delinquency.

Members of Mr. Oswald's drama class have written plays for their quarter credit in that class. Several students have handed in plays of different types, and the class hope to have time to act them out during the drama period.

Members of the eighth grade class of the Grammar school were guests of the high school last Thursday. "Big Sisters" were appointed by the Girls' League to take the eighth grade girls to their classes so that they might become acquainted with the usual high school routine.

Members of the class were guests of the assembly which was held for student body nominations, also.

An assembly was held last Thursday, for the purpose of installing next year's Girls League officers of both Banning and Palm Springs. Nominations were also made for the officers of the Palm Springs and Banning high school student bodies. The election was held Tuesday.

A tea was given by the sixth period Home Management class last Thursday. Delicious refreshments which were made by the pupils were served. Miss Kueffer was hostess of the tea.

The announcements for the seniors have arrived and are available to the students who present both their bill and their money.

TO VISIT SAN BERNARDINO ON SATURDAY

Culbert L. Olson, state senator and candidate for governor, will confer with his San Bernardino and Riverside county supporters at the California hotel next Saturday, according to P. E. Longstreet, chairman of the San Bernardino county division of the Olson campaign.

Senator Olson will be at the hotel from 11:00 A.M. to 8:00 P.M. Following the banquet of the state convention of Young Democrats Saturday night, he will address a gathering of his campaign workers and supporters at the Knight of Pythias Hall.

The fiscal year starts July 1, and from that date on finances will be available for carrying on construction at top speed.

RODEO AT SAN JACINTO NEXT SUNDAY AND MONDAY

Combining the second annual rodeo and the 50th anniversary of the community, citizens of San Jacinto are preparing for a gala occasion on Sunday and Monday, May 29-30, when a joint celebration is scheduled.

Entries are already being accepted for the various events outstanding of which will be a number of open and thoroughbred quarter mile races. Rodeo events include calf roping, bucking, team roping, steer riding and novelty events. Cash prizes, in addition to entry fees, will be awarded in each event.

New grounds, with grandstand accommodations for 3000, are being erected on property on the main highway between San Jacinto and Hemet. Various carnival attractions will be held at the arena grounds.

The racing and rodeo program is in charge of the newly formed San Jacinto Rodeo association of which Oscar Corning is president. Bucking horses and other rodeo stock will be furnished by George Demaree.

THIRST FOR BEER AND WINE DURING MARCH DECREASES

California's thirst for beer and wine during March this year was considerably below that prevailing in the same month of 1937, a report of the state board of equalization indicated.

Despite a substantial increase in sales of the beverages for March, as compared with those of February, the distribution reported to the board was 16.94 per cent less than in the third month of the preceding year. Compared with March, 1937, the beer sales were down 14.85 per cent; still wine sales dropped 6.03 per cent, and sparkling wine sales decreased 52.59 per cent.

During the month the board collected beverage taxes on beer and wine amounting to \$149,515.87, compared with \$98,517.19 for February. The tax in March, 1937, totaled \$179,999.68.

The March, 1938 assessment was levied on sales of beer totaling 5,947,938 gallons, 1,760,952 gallons of still wine, and 44,529 pints of sparkling wine.

OWL BOAT CO., Inc.

Sundays and holidays: \$50.00 for 20 passengers; all over 20 passengers, \$2.00 per person.

A deposit of \$10.00 required in advance.
All boats are government and state inspected and Diesel powered with the exception of the troller.

ANNUAL BARBECUE AT INDIAN SCHOOL MONDAY, MAY 30

Tickets are selling steadily for the barbecue and fiesta to be given at St. Boniface Indian School on Monday, May 30.

Program features will include an address by Sheriff Carl Rayburn and music by the Indian School band.

A fine barbecue will be served, and the day promises to be a gala event.

Local patronage of the affair will be large, as this is a local institution of merit, deserving the support of all.

NEW PLAN FOR PROTECTION OF VETERANS' HOMES

Protecting the families of more than 17,000 veterans from foreclosure on their homes by the state, a new plan for loan insurance has been approved by the State Veterans' Welfare board, according to R. J. Welch of Riverside, a board member.

Under provisions of the new program, veterans will be permitted to take out life insurance policies in an amount equal to the unpaid balance on their home loans. Regardless of age, occupation or present physical condition the veterans will be given the policies at the premium charge of \$1 a month for each \$1000 of insurance.

In 20 years America has had two cabinet members who broke ribs falling in bathtubs. Both were secretaries of the navy.—Detroit News.

ADVERTISE in The Desert Sun for best results.

Closed Areas In San Jacinto Mountains

At midnight on Sunday, May 22, fire closure went into effect in the San Jacinto range district in all areas where it was effective last summer, according to District Ranger R. H. May. These areas are posted, and are closed to all public use except use of the state and county highways, May said.

May warned visitors to the mountains that the smoking ban is already in effect, and that no smoking is allowed except at habitations, public camp grounds and specially posted areas. Motorists must refrain from smoking in their cars.

The public camp grounds are in good shape, and all are open with the exception of the Black Mountain camp, May pointed out. The Black Mountain camp is inaccessible because of gullies in the road.

A radio-cast program of Christian Science will be given over KFWB (50kc), Hollywood, on Sunday, May 29, from 4:30 to 5 p. m., under direction of the Christian Science Committee on Publication for Southern California, in co-operation with the Federation of Protestant Churches of Los Angeles. The broadcast will be conducted by George L. Dykeman. First Reader of Fourth Church of Christ, Scientist, of Los Angeles, assisted by Gordon Campbell, soloist, and Mrs. Emma C. Grimes, organist of the church.

(Continued From First Page)

ordinance will not be retroactive, and that therefore each zone will have non-conforming buildings and businesses. If the non-conformer discontinues use for a period of 12 months, he loses his rights as a non-conformer, and the building or business must be conformed to the uses prescribed in the zone in which it is located.

HIGHWAY FRONTAGE

Most of the protests voiced at the hearings were relative to Palm Canyon Drive frontage in the northern part of town. Frontage north of El Mirador on the east side and north of Aljejo road on the west side of the street is zoned as multiple family or single family dwellings.

Attorney Horace Cook stated that a large portion of this property was sold at a higher price as business property, and is assessed much higher than the property more desirable for residential purposes which is back of it. He said that the Palm Canyon frontage in Las Palmas Estates and Merito Vista is assessed at \$3000 a lot, whereas the property just back of it is assessed at \$900 a lot. Because of the business establishments spotted along this frontage, no one would build a multiple or single family residence, yet if the zoning law is passed as proposed it cannot be used for business purposes and consequently will not be used at all and values will be greatly reduced, he claimed.

BUSINESS ZONE

At last night's meeting Attorney Heber Winder spoke for his client, Mrs. Pearl McManus. He asked that the highway frontage south of the Builders Supply Company be zoned as business. Harry Batchelor, vice-president and sales manager of Smoke Tree Ranch, asked that Smoke Tree be zoned for estates.

Walter L. Holubar and Grover Goodman asked to have Ramon Road and Indian Avenue frontage near the junction of the two streets in the Vista Santa Rosa Tract near Jo-Al's night club zoned for business. Mr. Holubar contemplates the construction of a battery and ignition station. Mr. Goodman also wanted his 10 acres northeast of El Mirador included in the business zone.

Other speakers were A. J. Cole, Harold J. Hicks, Charles Mathews, and Mrs. Fleming.

City Planning

(Continued From Page One)

"I have heard some weeping and wailing regarding the Indian reservation in the heart of town. In my opinion this Indian reservation constitutes a most fortunate situation, because it is a section in virgin condition that will be sold sooner or later. It is the ideal location for parks and a civic center.

"A city like Palm Springs that invites people from all parts of the world should make ample provision for recreation. It should have parks, a public swimming pool, bridge paths, a golf course, and other recreational facilities. You can't expect the Desert Inn to provide lawns for people who are not their guests."

F.H.A. WANTS ZONING

Speaking of zoning, he said every lending agency has recognized its stabilizing influence, and the Federal Housing Administration now demands a report on the stability of a neighborhood before it will insure a loan.

There should be an adequate zone for industries, even in Palm Springs, and he called attention to the fact that this city either has or will have such industries as lumber yards, laundries, ornamental iron works, rock and gravel plants, stables, ice cream factories, animal hospitals, cold storage plants, junk yards, warehouses, etc., etc. Residences should not be permitted in the industrial districts, excepting quarters for watchmen and caretakers.

There should be special zones for churches and mortuaries, hospitals and schools, dairying, retail business, multiple-family buildings, and single family dwellings.

Mr. Coll said there is an emergency for temporary zoning until the city planning commission can become active and a master city plan can be adopted. On that planning commission there should be men who have no political or personal axes to grind, who are unselfish, unprejudiced, and fearless.

An open fireplace will help with the ventilation of cellar game rooms. Aside from the decorative value and the customary uses of the open hearth the presence of a fire will suck up bad air that would otherwise hover like a carpet over the floor.

A fireplace may be built with funds obtained under the Property Improvement Credit Plan of the Federal Housing Administration.

Sheriff Rayburn's Men Don Summer Garb

With summer descending with a vengeance this week, sheriff's officers, stationed in various parts of Riverside county, blossomed out in summer garb.

The minions of the law doffed their winter uniforms of heavy material, shed their blouses and jackets and wooed a more comfortable summer.

The lighter uniform resembles the winter garb except in weight of the material, and in the headgear. Caps, worn with winter togs, went into mothballs and light gray, high crown, broad brim hats took their place.

This is the first summer that the entire sheriff's personnel is in uniform.

The work of outfitting 29 officers has been completed by Sheriff Carl Rayburn during recent months. However, the county paid not a cent for the uniforms; the officers put up the entire outlay of cash which exceeds \$100.00 for the outfit.

Rayburn put the uniform program into effect this year to improve the appearance of his 29-man unit and to make the deputies more readily recognized in the many phases of their work where a uniformed officer is necessary.

Officers shown in picture are Lonnie Tate of Hemet in summer uniform, and Jack Bennett of Riverside in winter uniform.

Credit Bureau

(Continued From First Page)

bureau you have a legal protection which you do not have when giving information direct to an individual inquirer."

PUBLIC WANTS SERVICE

Reports from other communities where credit bureaus are operating, show that such a bureau encourages trading at home, for any individual who does not pay his bills in his home town cannot receive credit in another town where there is a credit bureau. Secretary Dudley has already received demands for credit reports on local people from credit bureaus in neighboring towns. He has also received inquiries from people wanting help and applications for employment. The free employment bureau operated by the Association will be able to keep all members supplied with honest, efficient help, which is a service in great demand especially by hotels during the busy season.

The following excerpt from the letter sent out today by the Association shows the extent of the service.

"We are ready and must start now to build the credit files. Certain definite information is necessary to an accurate and complete credit report. To assist you in providing this information and to facilitate our preparation of master cards we have prepared 'confidential credit report' forms (pink in color) which will be furnished you without cost in any quantity desired. A sample form is enclosed with a 'model fill-in' of how it should be used.

FREE EMPLOYMENT SERVICE

"Another of our important functions is the operation of a free employment service.

"We want to and must cover the field thoroughly. To supplement the information procured from your accounts receivable ledgers and to insure a complete set of records for our files we have also prepared an 'employee record' form (white in color)

a sample of which with 'model fill-in' is enclosed. We ask that you prepare the record of every employee on your payroll at the present time. Here we wish to recommend another use for this form. When the active season opens this fall you may have new employees and additions to your personnel as the season progresses.

"Fill out and send to this office one of these 'employee record' forms for each new employee even though he or she be only temporary. We will then have a record of that person's presence and record in Palm Springs. That will be valuable to both the Employment and Credit Bureaus. And when all employers are doing this it will be valuable to you."

Miss Helen McEwen, Desert Sun society reporter during the past season, dropped in from Long Beach on Wednesday of this week and spent a few hours in the village.

Mrs. Joseph Butler, wife of the manager of the local Safeway store, spent this week at Balboa Beach.

MORE GAMBLING OUTFITS
CONFISCATED BY SHERIFF
IN RIVERSIDE COUNTY

Continuing his campaign to rid the county of gambling equipment, Sheriff Carl Rayburn Monday night revealed the seizure of several automatic pay-off marble machines.

"Several persons are of the opinion that such machines are not gambling devices, but we believe they are in every way similar to other automatic gaming equipment," explained Under-sheriff Steve Lynch who led the deputies who obtained the machines.

The confiscation of equipment was the third such raid within the past month.
